Accident to the Steamer Newdood -As the Newport was coming out of New York Wednesday evening she collided with the propeller Oceanis of Providence, and had her wheel house stove, and some other damage done so that she was not able to proceed on her trip. She was accordingly taken back to the wharf and har passengers of which they are not guilty, as was the case transferred to the steamer Bristel, and as the Captain did not think proper to land the Newport's passengers here they were taken to Bristol. The baggage remained on the rence. In vain are appeals of mercy to original boat as there was not time before passing the gate to transfer it. The freight comes on by propeller.

The Old Colony took her place on the route last evening, in the place of the Newport, making her first trip since the accident to her machinery last spring.

Thanksolving.-The day was very gen erally observed in the city yesterday—more generally, in fact, than on some previous occasions. The congregations at the differ ent churches were not as large as might have been, but they were quite respectable. Some family gatherings were interfered with by the non-arrival of the New York boat, though, on the whole, the day was kept after the New England style. The rain in the afternoon was more like a gentle April shower than an autumnal storm and can searcely be said to have interfered with the pleasures of the day.

THE SECRET. -- Weston is reported to have ance served as collector for a newspaper of fice. That fact accounts for his skill as a predestrian. We know a man in these parts who has been practicing in the same way for some time and he is not through yet: We judge from present prospects that by the little he collects all that is due he will be able to make his one hundred miles. It is also said that Westen weighs more there he did when he left Portland. He eaght to; he has been on the 'weigh' all the tinac. It is pretty certain his steps are heavier than they were.

On Time.---Two new town clocks are be ing put up in Pawtucket where the people are bound to be on time. It is to be hoped they will do better than the venerable time piece on Trinity, which is right only twice in every twenty-four hours.
